

**Amendments to the Specification:**

Please cancel the amendment made to page 1, line 1, in the amendment filed on November 12, 2004.

Please replace the paragraph starting on page 15, line 1, with the following amended paragraph:

-- The A/V appliances 2-7 transmit information about their available A/V presentations via the optical network 1. The information includes an individual name for the presentation and at least one classification. For the CD changer 2, the title of the inserted CD and also the titles of the individual pieces of music and a classification for these pieces of music, such as "Rock", "Pop" or "Folk music", are transmitted. This information may be stored on the CD itself. However, the CD may also be identified by a key (e.g. TotalTrackTime \* Tracks) and the information about the CD may be taken from a database. --
